

GRIDS FOR LIGHT&DARK

GRIDS 2R FOR SMD LIGHT&DARK

The 2Rx2 grids are designed for Light&Dark 1Rx2 optics with a light point distance of 40 mm. Their fine, matt surface structure makes them ideal for use in office and retail areas and, in conjunction with the corresponding optics, they provide very glare-free and homogeneous light with high efficiency. The grids can simply be clipped onto the optics and are ideal for compact applications.

The pyramid-shaped, stepped surface of the Pyra40 grid reduces the visibility of dust particles and creates a very appealing lighting effect in the room.
